Alan L. Clem, Associate Director

The Governmental Research Bureau of the University of South Dakota was established in July, 1939, by the Board of Regents upon the recommendation of President of the University and the Dean of the College of Arts & Sciences. The Bureau's essential function is to conduct continuing research on governmental and political problems, ordinarily but not exclusively those of the state or its local subdivisions.

The research projects of the Bureau are directed by the staff of the Department of Government. An extensive, classified collection of pamphlets, special studies, governmental reports, and newspaper clippings is maintained for the use of students and all persons interested in governmental problems.

The Bureau seeks to render, on behalf of the University, a continuous public service to the people of South Dakota.

FOREWORD

This collection of 1972 general election voting data from the precincts of South Dakota is made possible by the kind cooperation of former Secretary of State Alma Larson and her successor, Lorna Herseth, and their staffs, as well as the staffs serving in the offices of the state's 64 county auditors. Their help has made it possible to verify county and state returns published earlier by the state and to provide current precinct election data in a handy form for the news media, political party officials, candidates, scholars, students, and other interested citizens.

This study continues a series of Bureau publications which has been concerned with precinct level voting within the state over the past generation. South Dakota is one of a very limited number of states which has bothered to collect, verify, and publish precinct level voting information, which is the basis of sophisticated contemporary election night projections as well as tactical campaign planning.

Mr. Terry Anderson, a student research assistant in the Bureau, punched the voting data from official county records collected by the Secretary of State. Mrs. Marlene Flynn, secretary of the Bureau, scrutinized each county report carefully, checked out inconsistencies or other data problems with county offices, and performed various coding operations preparatory to the key-punch stage. As in the past, Dr. Delane Dalton of the USD Computer Center provided indispensible assistance throughout and is responsible for the program.

The reader is cautioned to read the introductory note. Dr. Clem assumes responsibility for the data and needless to say would appreciate receiving word of any errors that may appear.

INTRODUCTORY NOTE

Precinct voting data is arranged by county, and each county appears in alphabetical order. Within the county, precincts are segregated into city, town, and rural groups, following the practice of the earlier compilations of precinct voting data mentioned in the Foreword.

For purposes of subsequent computer utilization in furtherance of various research endeavors, each precinct in the state has been assigned a unique, four-digit number, the first two digits being county designators. This four-digit number is listed at the beginning of the precinct's data line. Additional identifying numbers are also listed where the county designates its precincts numerically, and these follow immediately after the four-digit number. Numbers following city and town names designate wards and/or precincts as utilized by the municipality. Where counties have assigned numbers to precincts, precincts are listed in numerical order within each of the three categories (city, town, rural). Where counties have not assigned numbers to precincts, precincts are listed in alphabetical order within each of the three categories.

A number of discrepancies were found between the county data as published by the state and the county totals produced by these precinct data. These minor differences do not affect the outcome of any election. Discrepancies are as follows:

Office	Candidate	(Party)	County	Official Report	Precinct Totals	Difference
President	McGovern	(D)	Brule	1665	1655	10
President	Nixon	(R)	Brown	8134	8132	2
